WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A U of 40 x 20 x 2 tube, standing 40 tall, 20 deep.

Front bar 440 long outside; two side legs 210 long outside, mitred at 45 degrees to the front bar and welded all round.

Side legs: two 11 mm holes in the inner face of each, 120 and 140 mm from the leg's open end, centred on the tube's height; set an M8 rivet nut in each.

Fit: the inner faces of the legs bear on the subframe's bumper brackets; two M8 bolts each side. The tube's bottom is 90 mm above the floor; the front bar is 30 mm behind the wheel treads.

The safety edge rail is riveted to the front and side faces.

Check: the legs are parallel, 400 mm apart inside, within 1 mm.
