WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Shelf: one flat piece of 3 mm steel plate, 118 long x 80 wide, laser or plasma cut. No bending.

Holes: two 5.5 mm holes, 30 apart sideways, 68 from the back edge, to match the rivet nuts in the top of the hoop's front bar; four more to suit the scanner's own mounting holes.

Fit: the shelf lies on the top of the hoop's front bar, reaching 58 mm back and 40 mm forward, with 2 mm of air over the safety edge. The scanner stands on it: scan plane 173 mm above the floor, front 10 mm behind the safety edge face.

Check: shelf flat and level within 1 degree; 2 mm clear of the edge.

PalletPilot safety scanner shelf: making sketch
