WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Top plate: 6 mm steel, 295 x 400 mm. Front corners cut off at 45 degrees, 50 mm along each edge. Pump notch: radius 62 mm, centred 15 mm in front of the front edge on the centre line (reaches 47 mm in).

Holes (from the front edge; sideways from the centre line):

- clamp bolts 13 mm at 49 back, 35 and 80 each side;
- enclosure feet 9 mm at 80 and 270 back, 162 each side.

Under the plate, square to it, welded both sides:

- front hangers, 6 mm, 24 x 59, inner faces 174 out, centred 75 back, 16 mm hole 37 below the plate;
- rear hangers, 10 mm, 28 x 94, inner faces 180 out, centred 275 back, 20 mm hole 74 below the plate;
- bumper brackets, 6 mm, 40 x 119, flush with the side edges, 215 to 255 back, two 9 mm holes 109 below the plate at 225 and 245 back.

On top, left edge: lever bracket, 6 mm, 60 x 60, inner face 194 out, 250 to 310 back; 12 mm pivot hole 35 up at 290 back; stop tab 15 x 21 x 12 on its outer face, 13 mm up, 255 to 270 back.

Check: hangers square to the plate; the two hanger holes of each pair line up (a 16 mm and a 20 mm bar slide through).
